## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Berry et al. (5,311,302).

Regarding claim 10, Berry discloses a modular control unit for a control panel (12) showing an operating unit (90), a control module (82), the control module comprising a first interface (44) for connection to the control panel, and at least a second interface (110) for connection of the operating module, and the operating module comprise at least an inter face (108) for connection to the control module, the operating module further comprising a plurality of keys (24), each of said plurality of keys having a liquid crystal display (Figure 4).

### ***Allowable Subject Matter***

3. Claims 1-9 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: Prior art does not teach the operating module further including a parallel-in-serial-out shift register for receiving parallel data representing a status of the operating module and serially outputting the data, the shift register being clocked by the control via the interface as recited in claims 1 and 6.
